PROFESSIONAL SUMMARY

Senior mobile engineer with 8+ years of native iOS experience delivering ordering, delivery, kiosk, mapping and payment-enabled applications. Strong hands-on background in Swift, SwiftUI, UIKit, MVVM, REST APIs, Firebase, Core Data and App Store release delivery. Brings production troubleshooting, performance work, code review and Agile collaboration to mobile product teams.

CORE SKILLS

iOS: Swift, Objective-C, SwiftUI, UIKit, Xcode, Auto Layout, Core Data, XCTest, XCUITest

Mobile services: REST APIs, URLSession, Firebase, Crashlytics, Analytics, Maps, Push, Deep Links, Payments

Architecture & delivery: MVC, MVVM, VIPER, Clean Architecture concepts, Git, Fastlane, CI/CD concepts, Agile, Jira

Cross-platform: Flutter/Dart and React Native portfolio labs with typed state, repository boundaries and error handling

EXPERIENCE

Senior Mobile Application Developer | GCC Ginco Sharjah LLC

Dubai, UAE | Jul 2025 - Present

- Design, build, test, deploy and maintain mobile applications for iOS and Android using modern frameworks and clean coding standards.
- Integrate REST APIs and third-party services; collaborate with backend teams on secure data handling and reliable workflows.
- Own debugging, release updates and application maintenance across store delivery workflows.

Senior iOS Developer | Seldom

Tamil Nadu, India | Apr 2022 - Jul 2025

- Delivered and maintained native iOS features using Swift, UIKit, Auto Layout, MVC and MVVM in Agile teams.
- Improved responsiveness with Grand Central Dispatch, reducing reported main-thread blocking by 40%.
- Set up Firebase Crashlytics and Analytics; contributed to a reported 65% crash-rate reduction; supported code reviews and junior developers.

iOS Developer | Hoffensoft

Coimbatore, India | Jun 2021 - Mar 2022

- Led iOS delivery for Papa Murphy's ordering, curbside pickup and payment workflows using Swift 5.3, UIKit, Core Data, URLSession and XCTest.

iOS Developer | Trioangle Technologies

Madurai, India | Apr 2019 - Jun 2021

- Developed GoferDeliveryAll and GofereatsKiosk: multi-vendor delivery, maps, Firebase-related services, push notifications, deep links and REST workflow integration.

iOS Developer | Proloon Infotech

Chennai, India | Nov 2017 - Mar 2019

- Built delivery applications with Swift, Objective-C, Storyboards, MapKit, URLSession and CocoaPods, including payment, location, offline and App Store release workflows.

SELECTED PRODUCT EXPERIENCE

Papa Murphy's Take N Bake Pizza: ordering, pickup, payments, profile, order history and store location workflows.

GoferDeliveryAll and GofereatsKiosk: delivery marketplace, restaurant ordering, map tracking, notifications, payment and POS-related flows.

RouteWise (public portfolio): SwiftUI delivery-operations demo using synthetic data, MVVM and clear loading/error states.

EDUCATION & CERTIFICATIONS

Diploma in Electronics and Communication Engineering - AMS College of Engineering, Chennai

HackerRank: Swift, Problem Solving, REST API | TestDome: iOS Development

Languages: English, Tamil, Hindi, Malayalam

Portfolio note: Flutter and React Native are transparent portfolio capability, not represented as unverified production employment. Client source code and client data are not published.
